

## How to Edit a File on Github.com (Specifically, drive\_test.c)

1. Navigate to <https://github.com/>
2. Sign in.
3. Click on the button with your username and avatar on it in the top right corner. (see Figure 1)
4. Click on the correct repository in the left center part of the page. In this case, it is our Code repository. (see Figure 2)
5. Navigate to the file you want to edit. In this case, you must simply click on the drive\_test.c file. (see Figure 3)
6. Click on the little pencil icon in the left center part of the page to edit the file. (see Figure 4)
7. Edit the file.
8. Commit your changes. (see Figure 5)
